

Privacy Impact Assessment (PIA) Register

Introduction

The *Privacy (Australian Government Agencies – Governance) APP Code 2017* (Cth) (the Privacy Code) requires that all agencies, including the Department of Communications and the Arts (the department) must conduct a Privacy Impact Assessment (PIA) for all high privacy risk projects.

A project may be a high privacy risk project if the department considers that the project involves any new or changed ways of handling personal information that are likely to have a significant impact on the privacy of individuals.

The department is also required to conduct a PIA if directed to do so by the Office of the Australian Information Commissioner (OAIC).

The department is required to maintain a register of all PIAs it conducts and must publish that register, or a version of that register, on its website.

This following PIA register is published in full compliance with the APP Code requirements.

Privacy Impact Assessments Undertaken

The department has undertaken the following PIAs:

Title of project	Short description of project	Date the PIA was signed	Branch responsible
National Arts and Disability Strategy national consultations	National consultation with arts and disability stakeholders to inform a renewed National Arts and Disability Strategy	07/09/2018	Access and Participation Branch
Advanced Mobile Location information for the Triple Zero Emergency Call Service	Implementing arrangements that will improve the accuracy of location information provided by callers from mobile phones to the Triple Zero Emergency Call Service	14/05/2019	Consumer Safeguards Branch
