

Regional Connectivity Program—funded projects

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
CiFi Pty Ltd	Christmas Island— Top of the Mountain connectivity	Fixed Wireless Broadband	Christmas Island	External Territory	The project will extend CiFi's existing fixed wireless network at the Settlement on Christmas Island to the residential area known as the 'top of the mountain'. The network will provide improved broadband connectivity to the majority of residents and businesses in Christmas Island's largest residential community, supporting the productivity of local businesses and enabling community access to telehealth, education and other essential digital services.	\$405,400
Bullroarer Networks	Larras Lee & Boomey Fixed Wireless Network	Fixed Wireless Broadband	Larras Lee	NSW	The project will deploy a fixed wireless broadband and VoIP network in the communities of Larras Lee and Boomey, north of Molong. The network will enable the uptake of new agricultural and business technologies for local farms, as well as improving access to telehealth and education for residents.	\$93,306

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Bullroarer Networks	Murrumbateman Fixed Wireless Network	Fixed Wireless Broadband	Murrumbateman	NSW	The project will deploy a fixed wireless broadband and VoIP network on the eastern side of Murrumbateman. The network will enable the uptake of new agricultural and business technologies for a number of wineries, as well as improving access to telehealth and education services for residents.	\$150,399
Costa Group	Connecting Costa Group – Growing the Guyra District and New England Region: Elm St	Fibre Broadband	Guyra	NSW	The project will upgrade the NBN access technology at the Costa Group hydroponic tomato glasshouse facility at Elm Street, Guyra from Sky Muster Satellite to Fibre to the Premises. The upgrade will support expanded business operations at the facility, including in administration, research and horticultural production, with benefits to the local economy through increased employment opportunities and regional output.	\$263,945
Costa Group	Connecting Costa Group – Growing the Guyra District and New England Region: New England Hwy	Fibre Broadband	Guyra	NSW	The project will upgrade the NBN access technology at the Costa Group hydroponic tomato glasshouse facility on the New England Highway at Guyra from Sky Muster Satellite to Fibre to the Premises. The upgrade will support expanded business operations at the facility, including in administration, research and horticultural production, with benefits to the local economy through increased employment opportunities and regional output.	\$256,073
Country Broadband Network	Connecting the Outback	Fixed Wireless Broadband	Boggabilla	NSW	The project will extend Country Broadband Network's existing fixed wireless network in the Boggabilla area. The network will provide access to high-speed broadband connectivity for up to 400 people, enabling the uptake of new agricultural and business technologies and improving access to telehealth and education services.	\$130,000

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Fields Solutions Group	R.A.N (Regional Australia Network): Gunnedah	Fixed Wireless Broadband	Gunnedah	NSW	The project will deploy a fixed wireless network in the Gunnedah Shire and to neighbouring areas in the Liverpool Plains and Tamworth Regional Shires. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies in a high-value cotton, beef and broadacre cropping region and improving access to telehealth and education services.	\$3,967,392
Fields Solutions Group	R.A.N (Regional Australia Network): Moree	Fixed Wireless Broadband	Moree Plains	NSW	The project will deploy a fixed wireless network in the wider Moree region, including the towns of Mallowa, Bullarah, Pallamallawa, Gravesend, Collarenebri and North Star, as well as part of the Gwydir Highway. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies and improving access to telehealth and education services.	\$2,403,276
Fields Solutions Group	R.A.N (Regional Australia Network): Murrumbidgee	Fixed Wireless Broadband	Murrumbidgee	NSW	The project will deploy a fixed wireless network in the Murrumbidgee region, southwest of Leeton. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies for local irrigators and tourist providers and improving access to telehealth and education services.	\$720,823

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Fields Solutions Group	R.A.N (Regional Australia Network): Warren	Fixed Wireless Broadband	Warren	NSW	The project will deploy a fixed wireless broadband network in the Narromine-Warren region. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies in a significant cotton, grain and livestock region with development opportunities in tourism and manufacturing, and improving access to telehealth and education services.	\$1,627,599
Telstra	Mossgiel	Mobile Voice & Data	Mossgiel	NSW	The project will upgrade antenna equipment and backhaul capacity at the existing Telstra 3G base station in the community of Mossgiel to provide Telstra 4GX and Internet of Things coverage to the area and along the Cobb Highway. The upgrade will enable the adoption of farm and rural water management solutions to support the productivity of the agriculture sector, as well as improving access to telehealth, education and emergency communications.	\$269,290
Telstra	Oxley	Mobile Voice & Data	Oxley	NSW	The project will upgrade antenna equipment and backhaul capacity at the existing Telstra 3G base station at Oxley to provide Telstra 4GX and Internet of Things coverage to the town and surrounding areas. The upgrade will enable a range of smart farming and smart water management solutions to promote productivity in this area, as well as improving access to telehealth, education and emergency communications.	\$616,140

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	Tooma	Mobile Voice & Data	Tooma	NSW	The project will deploy a Telstra 4GX macro cell base station in the Snowy Valleys community of Tooma. The new base station will enable the uptake of new agricultural and business technologies for livestock and dairy producers and local tourism operators, as well as improving access to telehealth, education and emergency communications.	\$458,080
Wi-Sky NSW	Cootamundra-Gundagai & Snowy Valleys Council Solution (CGSVCS)	Fixed Wireless Broadband	Cootamundra-Gundagai, Snowy Valleys	NSW	The project will deploy an extended fixed wireless network across the Cootamundra-Gundagai and Snowy Valleys regions. The network will provide high-speed residential and enterprise broadband services to communities across a wide area using an innovative, low-cost and disaster-resilient design suited to local conditions.	\$201,000
Wi-Sky NSW	Hilltops Council Regional Connectivity Solution (HCRCS)	Fixed Wireless Broadband	Hilltops	NSW	The project will deploy an extended fixed wireless network across the Hilltops region. The network will provide high-speed residential and enterprise broadband services to communities across a wide area using an innovative, low-cost and disaster-resilient design suited to local conditions.	\$278,000
Wi-Sky NSW	Upper Lachlan Rural Connectivity Solution (ULRCS)	Fixed Wireless Broadband	Upper Lachlan	NSW	The project will deploy an extended fixed wireless network across the Upper Lachlan region. The network will provide high-speed residential and enterprise broadband services to communities across a wide area using an innovative, low-cost and disaster-resilient design suited to local conditions.	\$328,246

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Developing East Arnhem Limited	Yirrkala Satellite to Fibre to the Premise Technology Switch	Fibre Broadband	Yirrkala	NT	The project will upgrade the NBN access technology in the East Arnhem town of Yirrkala from Sky Muster satellite to Fibre to the Premises. The upgrade will support economic diversification opportunities in cultural tourism, creative industries and the health sector, as well as improving access to telehealth and education services.	\$2,342,266
Fields Solutions Group	Satellite Backhaul Broadband Services for NT Remote Communities	Satellite Broadband	Arrewerr, Mungkartar, Gan Gan, Wandawuy	NT	The project will deploy a satellite backhaul broadband solution servicing the remote communities of Arrewerr, Gan Gan, Mungkartar and Wandawuy. The service will provide pay-as-you-go broadband data to residents, enabling improved access to telehealth and education services.	\$574,398
Telstra	Arnhem Fibre Upgrade Project	Fibre Backhaul	Arnhem	NT	The project will upgrade core transmission equipment at Telstra sites across East Arnhem Land, increasing existing backhaul capacity between Darwin and Nhulunbuy from 5 Gbps to 100 Gbps. The project will also upgrade the capacity of the existing Telstra 4GX base station at Mount Saunders near Nhulunbuy. The upgrades will support business development opportunities and increasing data needs in a number of sectors, as well as improving access to telehealth, education services and public safety connectivity.	\$2,770,778
Barcaldine Regional Council	Alpha Satellite to Fibre to the Premise Technology Switch	Fibre Broadband	Alpha	QLD	The project will upgrade the NBN access technology in the Barcaldine Shire town of Alpha from Sky Muster to Fibre to the Premises. The upgrade will support the operations of local businesses and community organisations, as well as improving access to telehealth and education services for residents.	\$3,181,572

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Barcoo Shire Council	Stonehenge Radio Tower 4GX Mobile Base Station Project	Mobile Voice & Data	Stonehenge	QLD	The project will deploy a new Telstra 4GX mobile base station east of Stonehenge. The new base station will address a coverage black spot on the Thomson Development Road and will increase coverage on the Stonehenge to Yaraka Road, improving traveller safety, emergency communications and freight monitoring.	\$101,873
Connected Farms Pty Ltd	Roma Datacentre and Regional Fixed Wireless Internet	Fixed Wireless Broadband	Roma	QLD	The project will deploy a fixed wireless network providing broadband coverage to the region south of Roma, as well as an edge datacentre to provide improved data management for agribusinesses in the region. This provides a significant uplift to connectivity in an agricultural area, enabling increased uptake of agtech and decision farming with benefits for productivity. The datacentre will also employ locally recruited and trained personnel.	\$541,000
Fields Solutions Group	R.A.N (Regional Australia Network): Balonne-Bollon	Fixed Wireless Broadband	Balonne	QLD	The project will deploy a fixed wireless network in the Balonne region, centred around the town of Bollon. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies for local livestock producers and improving access to telehealth and education services for residents.	\$1,406,679
Fields Solutions Group	R.A.N (Regional Australia Network): Isaac	Fixed Wireless Broadband	Isaac	QLD	The project will deploy a fixed wireless network in the Isaac region. The network will extend high-speed broadband connectivity into areas with limited existing coverage, enabling the uptake of new agricultural and business technologies for local livestock producers, including a new beef processing plant, and improving access to telehealth and education services for residents.	\$1,484,563

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Fields Solutions Group	R.A.N (Regional Australia Network): Napranum	Fixed Wireless Broadband	Napranum	QLD	The project will deploy a fixed wireless network in the town of Napranum. The network will enable the efficient delivery of essential services, such as health, education, public safety and cultural heritage initiatives, by the Napranum Aboriginal Shire Council.	\$356,908
Fields Solutions Group	R.A.N (Regional Australia Network): Paroo-Bulloo	Fixed Wireless Broadband	Paroo, Bulloo	QLD	The project will deploy a fixed wireless network in the Paroo and Bulloo Shires. The network will extend high-speed broadband connectivity into areas with limited existing coverage, supporting the uptake of new agricultural and business technologies, as well as providing improved communications along two significant tourist routes.	\$685,043
Fields Solutions Group	R.A.N (Regional Australia Network): Tambo	Fixed Wireless Broadband	Blackall-Tambo	QLD	The project will deploy a fixed wireless network in the Blackall-Tambo Shire region. The network will extend high-speed broadband connectivity into areas with limited existing coverage, supporting the uptake of new agricultural and business technologies, as well as enabling the effective provision of local medical services through telehealth options.	\$972,076
Findley Farms—Etta Plains AG Pty Ltd	Etta Plains Station connectivity project	Fixed Wireless Broadband	Etta Plains	QLD	The project will deploy a fixed wireless broadband and public Wi-Fi coverage to the Etta Plains area near Julia Creek. The network will enable the uptake of new agricultural and business technologies for a number of cattle stations and irrigators, as well as improving emergency communications in a flood-plain area.	\$152,250

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Gladstone Auto Club	Benaraby Motorsports Complex Telecommunication Project	Fixed Wireless Broadband	Benaraby	QLD	The project will deploy a fixed wireless network at the new Benaraby Motorplex. The network will provide high-speed broadband connectivity to the Motorplex and surrounding residential areas, enabling the new complex to host events attracting large numbers of tourists to the region and providing increased access to internet services for local residents.	\$298,200
NBN Co	Murweh Satellite to Fixed Line Technology Change: Augathella	Fibre Broadband	Augathella	QLD	The project will upgrade the NBN access technology in the Murweh Shire town of Augathella from Sky Muster satellite to Fibre to the Premises. The upgrade will support the operations of local businesses, increasing regional output and local employment, as well as improving access to telehealth and education services for residents.	\$1,965,973
NBN Co	Murweh Satellite to Fixed Line Technology Change: Morven	Fibre Broadband	Morven	QLD	The project will upgrade the NBN access technology in the Murweh Shire town of Morven from Sky Muster satellite to Fibre to the Premises. The upgrade will support the operations of local businesses, increasing regional output and local employment, as well as improving access to telehealth and education for residents.	\$1,985,698
NBN Co	Surat Satellite to Fibre to the Premise Technology Switch	Fibre Broadband	Surat	QLD	The project will upgrade the NBN access technology in the South West Queensland town of Surat from Sky Muster satellite to Fibre to the Premises. The upgrade will support growth opportunities in a number of sectors, particularly tourism, and will improve health, education and public safety connectivity in the community.	\$2,034,923

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
QCN Fibre	QLD Central Highlands Project: Bluff	Fixed Wireless Broadband	Bluff	QLD	The project will deploy a fixed wireless network to the town of Bluff, in the Central Highlands of Queensland. The network will extend high-speed broadband connectivity to the town, benefiting local community facilities, small businesses and residents.	\$1,554,000
QCN Fibre	QLD Central Highlands Project: Dingo	Fixed Wireless Broadband	Dingo	QLD	The project will deploy a fixed wireless network to the town of Dingo, in the Central Highlands of Queensland. The network will extend high-speed broadband connectivity to the town, benefiting local community facilities, small businesses and residents.	\$942,000
QCN Fibre	QLD Central Highlands Project: Duaringa	Fixed Wireless Broadband	Duaringa	QLD	The project will deploy a fixed wireless network to the town of Duaringa, in the Central Highlands of Queensland. The network will extend high-speed broadband connectivity to the town, benefiting local community facilities, small businesses and residents.	\$1,258,000
Telstra	Aurukun	Mobile Voice & Data	Aurukun	QLD	The project will upgrade the transmission and backhaul capacity at the existing Telstra 4GX mobile base station at Aurukun, a remote Indigenous community located on Cape York in Queensland. The upgrade will support online banking and financial transactions at existing retail businesses, as well as supporting local employment opportunities.	\$289,638
Telstra	Dajarra	Mobile Voice & Data	Dajarra	QLD	The project will upgrade antenna equipment and backhaul capacity at the existing 3G Telstra base station in Dajarra, to provide Telstra 4GX and Internet of Things coverage to the town and surrounding areas. The upgrade will support the operations of local businesses and enable remote working opportunities in the area.	\$1,314,300

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	Lake Moondarra	Mobile Voice & Data	Mount Isa	QLD	The project will deploy a new Telstra 4GX small cell base station to Lake Moondarra, the primary water supply facility for the Mount Isa region and an important social and recreation hub for the Mt Isa community. The new base station will enable improved tourism and retail services, water supply management, and public safety communications at the lake.	\$144,906
Telstra	Mornington Island	Mobile Voice & Data	Gununa	QLD	The project will upgrade the capacity of the existing Telstra 4GX mobile facility in the Indigenous community of Gununa on Mornington Island. The project will also upgrade the existing fibre network between Mt Isa and Point Parker, and deploy a new mobile site near Century Mine, to provide microwave backhaul capacity to the Mornington Island. The upgrades will support the delivery of government services, as well as health and education resources. Improved connectivity will also support expanded business opportunities in cultural and fishing tourism.	\$2,661,731
Wi-Sky Queensland Pty Ltd	Wi-Sky QLD North West Queensland Connectivity Project: Julia Creek	Fixed Wireless Broadband	Julia Creek	QLD	The project will deploy a fixed wireless broadband and public Wi-Fi coverage along the Flinders Highway between Richmond and Julia Creek. The network will enable the uptake of new agricultural and business technologies for pastoral producers and retail providers, including local online retailers and business operators. Improved connectivity will also improve access to telehealth, education services and public safety communications.	\$141,000

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Wi-Sky Queensland Pty Ltd	Wi-Sky QLD North West Queensland Connectivity Project: Stamford	Fixed Wireless Broadband	Stamford	QLD	The project will deploy a fixed wireless broadband and public Wi-Fi coverage along the Flinders Highway between Richmond and Stamford. The network will enable the uptake of new agricultural and business technologies for pastoral producers and retail providers, including local online retailers and business operators. Improved connectivity will also improve access to telehealth, education services and public safety communications.	\$202,000
Telstra	Ernabella	Mobile Voice & Data	Pukatja	SA	The project will upgrade the backhaul capacity to the existing Telstra 4G mobile tower in Ernabella (Pukatja). The upgrade will provide improved coverage and user throughput speeds for the Ernabella township and the surrounding community, including the local airstrip.	\$173,520
Telstra	Far North SA	Mobile Voice & Data	APY Lands, Leigh Creek, Hawker	SA	The project will upgrade key transmission infrastructure between Hawker and Leigh Creek in South Australia's far north, expanding the available core network capacity into Leigh Creek and Marree. This will facilitate the provision of fixed broadband services to Leigh Creek Area School and Marree Aboriginal School. The project will also upgrade the transmission capacity at Telstra's Mount Scott and Leigh Creek base stations, enabling improved 4G access. Telstra also will commission 4G Satellite Small Cells into the communities of Dalhousie Springs, Yunyarinyi, Nyapari, Murputja, Kalka, Kanpi and Watinuma.	\$2,559,011

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Wudinna District Council	Wudinna Satellite to Fixed Line Technology Change	Fibre Broadband	Wudinna	SA	The project will upgrade the NBN service technology in the town of Wudinna from NBN Sky Muster to NBN Fibre to the Premises. The upgrade will improve access to online education and health services, expand economic opportunities and increase connectedness and digital capabilities in the community.	\$1,841,244
Fortytwo24 Pty Ltd	Enhancing Australia's Sovereign Space Capability	Fibre Backhaul	Melton Mowbray	TAS	The project will deploy an optical fibre extension between the Midlands Highway and Bisdee Tier to provide 10 Gbps data capacity to the Greenhill Observatory operated by the University of Tasmania. Improved connectivity at the Greenhill Observatory will allow UTAS and Tasmania to access applied commercial development opportunities in the burgeoning space industry, in partnership with government, local and international companies, and research agencies. This will assist to diversify the Tasmanian economy towards a high-value industry.	\$280,500
Huon Valley Council	Geeveston Fixed Wireless to Fibre to the Premise Technology Change	Fibre Broadband	Geeveston	TAS	The project will upgrade the NBN access technology in the Huon Valley town of Geeveston from Fixed Wireless to Fibre to the Premises. The upgrade will support improved connectivity for a number of local industries, as well as for health centres and local schools.	\$1,079,634
Telstra	Jericho	Mobile Voice & Data	Jericho	TAS	The project will upgrade antenna equipment and backhaul capacity at the existing 3G Telstra base station in Jericho to provide Telstra 4GX and Internet of Things coverage to the town and surrounding areas. The upgrade will enable increased commuter safety along a major transport route, as well as improving the attractiveness of the area as a tourist location.	\$190,560

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	King Island	Mobile Voice & Data	King Island	TAS	The project will upgrade the telecommunications network on King Island by upgrading the microwave transmission link between Victoria and King Island to significantly increase capacity, as well as deploying several new 4G sites and upgrading existing mobile network facilities across the island to provide new and enhanced mobile services to residents and businesses.	\$5,391,526
Telstra	TAS Schools	Fibre Broadband	Wesley Vale, Bagdad, Dunally, Forest, Glen Huon, Molesworth, Nubeena, Yolla, Sheffield	TAS	The project will upgrade and extend wideband connectivity to nine regional schools in Tasmania. This will involve the extension of new fibre to the schools as well as core transmission capacity upgrades to enable high-speed data services. The upgrade will also provide broader improvements to Telstra services in each community.	\$861,720
Fields Solutions Group	R.A.N (Regional Australia Network): Swan Hill	Fixed Wireless Broadband	Swan Hill	VIC	The project will deploy a fixed wireless network in the Swan Hill region. The network will enable the uptake of new agricultural and business technologies in a high-value irrigated farming area, as well as supporting local manufacturing and other diversification opportunities and improving access to telehealth and education.	\$975,932
NBN Co	Fixed Wireless to Fibre to the Premises Technology Change: Hopetoun	Fibre Broadband	Hopetoun	VIC	The project will upgrade the NBN access technology in the Southern Mallee town of Hopetoun from Fixed Wireless to Fibre to the Premises. The upgrade will provide improved connectivity to increase the economic competitiveness of the region and enable more efficient service delivery in the wider Southern Mallee area.	\$1,696,873

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
NBN Co	Fixed Wireless to Fibre to the Premises Technology Change: Murchison	Fibre Broadband	Murchison	VIC	The project will upgrade the NBN access technology in the Goulburn Valley town of Murchison from Fixed Wireless to Fibre to the Premises. The upgrade will provide improved connectivity to support local orchard, vineyard and dairy farm activities, as well as the delivery of health and education services to the community.	\$2,727,135
NBN Co	Fixed Wireless to Fibre to the Premises Technology Change: Rushworth	Fibre Broadband	Rushworth	VIC	The project will upgrade the NBN access technology in the Campaspe Shire town of Rushworth from Fixed Wireless to Fibre to the Premises. The upgrade will provide improved connectivity to support growth opportunities in tourism and health services, as well as increasing access to other essential services.	\$1,808,922
NBN Co	Fixed Wireless to Fibre to the Premises Technology Change: Teesdale	Fibre Broadband	Teesdale	VIC	The project will upgrade the NBN access technology in the Golden Plains Shire town of Teesdale from Fixed Wireless to Fibre to the Premises. The upgrade will provide improved connectivity to support population growth in the town, as well as enabling access to new agricultural, business and education and training technologies for local businesses and residents.	\$2,734,475
NBN Co	Fixed Wireless to Fibre to the Premises Technology Change: Timboon	Fibre Broadband	Timboon	VIC	The project will upgrade the NBN access technology in the Corangamite town of Timboon from Fixed Wireless to Fibre to the Premises. The upgrade will provide improved connectivity to support growth opportunities in tourism and hospitality, as well as existing dairying, forestry and lime production operations.	\$2,555,354

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	Broughton	Mobile Voice & Data	Broughton	VIC	The project will deploy a Telstra 4G macro cell base station in the West Wimmera community of Broughton. The new base station will provide improved mobile coverage and capacity to support the uptake of new agricultural and business technologies in a mixed farming region, as well as enabling improved access to essential services including health, education and emergency communications.	\$281,274
Telstra	Cabbage Tree Creek	Mobile Voice & Data	Cabbage Tree Creek	VIC	The project will deploy a Telstra 4G small cell base station at Cabbage Tree Creek, located near Bairnsdale in East Gippsland. The new base station will provide improved mobile connectivity to support economic diversification opportunities in tourism, agriculture and performing arts, as well as increased access to essential services including health, education and emergency communications.	\$124,026
Telstra	Eastern VIC	Mobile Voice & Data	Alpine Shire, East Gippsland Shire, Wangaratta Shire	VIC	The project will deploy a 42km fibre optic path between the townships of Tambo Crossing and Swifts Creek to create a transmission 'ring' between Wangaratta, Bairnsdale and Melbourne, improving the redundancy of the network against service outages. The project will also provide new and improved Telstra mobile coverage at multiple locations along the transmission route, including Mt Hotham, Ensay, Tambo Crossing, Omeo, and Dinner Plain. Upgraded coverage will support business activities and access to services in a number of highly visited tourist locations.	\$2,635,871

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	Gazette	Mobile Voice & Data	Gazette	VIC	The project will deploy a Telstra 4G macro cell base station in the Southern Grampians community of Gazette. The new base station will provide new and improved coverage and capacity to support the uptake of new agricultural and business technologies in a grazing region, as well as enabling improved access to essential services including health, education and emergency communications.	\$244,776
Telstra	Gipsy Point	Mobile Voice & Data	Gipsy Point	VIC	The project will deploy a Telstra 4G base station at Gipsy Point, approximately 16km north west of Mallacoota in the East Gippsland Shire. The new base station will increase the resilience and reliability of emergency communications in a bushfire-prone region, as well as supporting local tourism businesses and the delivery of essential services.	\$693,882
Telstra	Halls Gap East	Mobile Voice & Data	Halls Gap	VIC	The project will deploy a Telstra 4G macro cell base station on the east edge of the town of Halls Gap. The new base station will provide new and improved mobile coverage to a number of tourism and accommodation venues, as well as improving the delivery of essential services including health, education and emergency communications.	\$268,422
Telstra	Kobyboyn	Mobile Voice & Data	Highlands	VIC	The project will deploy a Telstra 4G macro cell base station in the Mitchell Shire community of Kobyboyn. The new base station will provide improved connectivity to support projected residential and business growth in the town due to its proximity to major road and rail transport routes, as well as increased access to essential services including telehealth, education services and emergency communications.	\$346,500

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Telstra	Lascelles	Mobile Voice & Data	Lascelles	VIC	The project will deploy a Telstra 4G macro cell base station to the town of Lascelles, located 113km west of Swan Hill in the Yarriambiack shire. The new base station will provide improved mobile connectivity to support the uptake of new agricultural and business technologies for local farms and tourism businesses, as well as improving emergency communications along local highways and increasing access to essential services.	\$605,766
Telstra	Toongabbie	Mobile Voice & Data	Toongabbie	VIC	The project will deploy a Telstra 4GX small cell base station to the Latrobe Valley town of Toongabbie. The new base station will provide dedicated mobile coverage to the community, supporting residential growth through improved access to business opportunities and essential services.	\$33,810
West Wimmera Shire Council	Kaniva Satellite to Fibre to the Premise Technology Switch	Fibre Broadband	Kaniva	VIC	The project will upgrade the NBN access technology in the West Wimmera town of Kaniva from Sky Muster to Fibre to the Premises. The upgrade will provide improved connectivity to support local agricultural and tourism businesses, as well as a number of community facilities providing health, education, post and emergency services to residents.	\$1,491,843
Australian Private Networks Pty Ltd	Jigalong Community Wi-Fi and Telephone Service	Satellite Broadband	Jigalong	WA	The project will deploy a fully managed public satellite Wi-Fi and VoIP telephone solution to the Aboriginal community of Jigalong. The service will provide pay-as-you-go data and voice connectivity to the community, supporting business opportunities in the tourism sector, the operations of the Jigalong Community Incorporated, and access to essential services such as telehealth, education and government services.	\$606,790

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Australian Private Networks Pty Ltd	Kalumburu Community Wi-Fi and Telephone Service	Satellite Broadband	Kalumburu	WA	The project will deploy a fully managed public satellite Wi-Fi and VoIP telephone solution to the Aboriginal community of Kalumburu. The service will provide pay-as-you-go data and voice connectivity to the community, supporting business opportunities in the arts sector, the operations of the Kalumburu Aboriginal Corporation, and access to essential services such as telehealth, education and government services.	\$664,000
Comscentre WA Pty Ltd	Radio Access Network: Shire of Halls Creek	Fixed Wireless Broadband	Halls Creek Shire	WA	The project will construct a fixed wireless network to deliver reliable, high speed broadband services and public Wi-Fi to the remote Aboriginal communities of Balgo (Wirrimanu), Billiluna (Mindibungu), Mulan and Ringer Soak (Kundat Djaru) located in the Shire of Halls Creek in the East Kimberley region of Western Australia. The network will provide improved connectivity to support access to online learning resources for the schools in these communities, as well as the uptake of new business technologies by local small businesses.	\$1,897,500
CRISP Wireless Pty Ltd	Central Wheatbelt Connectivity Backhaul	Fixed Wireless Broadband	Central Wheatbelt	WA	The project will deploy a fixed wireless network across the Central Wheatbelt region of Western Australia. The network will provide improved connectivity to support the uptake of new agricultural and business technologies by local primary producers and other businesses, as well as enabling improved residential access to essential services such as telehealth and education.	\$3,773,000

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Fields Solutions Group	R.A.N (Regional Australia Network): Wireless Wheatbelt Project—Central Midlands	Fixed Wireless Broadband	Central Midlands	WA	The project will deploy a fixed wireless network in the Dalwallinu, Moora and Wongan-Ballidu Shires within the Central Midlands sub-region of the Western Australian Wheatbelt. The network will provide improved connectivity to support the uptake of new agricultural and business technologies by local primary producers and other businesses, as well as enabling improved residential access to essential services such as telehealth and education.	\$5,299,784
Pivotal Mobile Pty Ltd	Frankland River 4G Network	Mobile Voice & Data	Cranbrook Shire	WA	The project will deploy a Pivotal 4G LTE 'ecoSphere' network in the Frankland River region of Western Australia. The network will provide improved broadband and mobile connectivity to support the uptake of new agricultural and business technologies for local primary producers and wine tourism businesses, as well as enabling improved residential access to essential services such as telehealth, education services and emergency communications.	\$294,733
Pivotal Mobile Pty Ltd	South Stirling 4G Network	Mobile Voice & Data	Albany	WA	The project will deploy a Pivotal 4G LTE 'ecoSphere' network in the South Stirling region of Western Australia. The network will provide improved broadband and mobile connectivity to support the uptake of new agricultural and business technologies for local primary producers and other businesses, as well as enabling improved residential access to essential services such as telehealth, education services and emergency communications.	\$117,976

Applicant	Project name	Technology type	Location	State	Project description	Grant amount (GST inclusive)
Shire of Halls Creek	Halls Creek Satellite to Fibre to the Premise Technology Change	Fibre Broadband	Halls Creek	WA	This proposal will upgrade the NBN access technology in the town of Halls Creek from Sky Muster satellite to Fibre to the Premises. The upgrade will provide improved broadband connectivity to support the delivery of essential services, such as skills training, education and health services to the town and surrounding areas, as well as supporting business opportunities in tourism, mining and civil construction.	\$1,775,341
Telstra	Bidyadanga	Mobile Voice & Data	Lagrange	WA	The project will upgrade the capacity of the the existing Telstra 4G base station in the Bidyadanga Aboriginal community. The upgrade will provide improved mobile connectivity to support growth opportunities in small business and tourism, as well as enabling increased residential access to essential services such as telehealth, education services and government services.	\$151,313
Telstra	Caiguna	Mobile Voice & Data	Caiguna	WA	The project will upgrade antenna equipment and backhaul capacity at the existing Telstra 3G base station in the small roadhouse community of Caiguna to provide Telstra 4GX and Internet of Things coverage to the area and along the Eyre Highway. The upgrade will provide improved connectivity to support the delivery of tourism, accommodation, hospitality and retail services at the roadhouse.	\$452,704
