Poor Internet services

To secretariat@rtirc.gov.au

To whom it may concern.

The Helensburgh district of 2508 NSW has less than substantial internet services available to the whole community.

The community is expanding rapidly with homes, businesses and schools yet the telecommunications infrastructure isn't able to cope with the demands and nothing ever seems to get updated here.

I know the entire town experiences constant drop outs and very poor speeds.

Is there ever any plans to upgrade our infrastructure? Or do we have to keep heading out of town to cafes etc for a more reliable connection?

Any feedback would be greatly appreciated.

Kind Regards,

Luke Gough
